

Burns and Carbon Monoxide Poisoning

Klin Khir. 1998;(11):21-3.

[Intensive therapy in burns and carbon monoxide poisoning]

[Article in Russian]

Grigor'eva TG, Balenko AA.

While treatment conduction of 38 patients with severe burns and poisoning with carbonic oxide in complex of antishock measures there was applied a nondirect electrochemical oxidation of blood and internal laser irradiation of blood. There was used He-Nd laser. The mortality lowering by 3.3 times in comparison with 40 patients, in whom the traditional intensive therapy was applied, was noted.
